BS-130
Smart Humidity Control Box

This Smart Humidity Control Box is exceptionally developed for the Swiftlet Farming Industry in Malaysia. This smart box is equipped with 3 individual sets of humidity/temperature sensors with cables and power switches. It offers a wireless connection to the APP on the smart phone. With this APP, users may set up the preferred humidity environment for their birdhouse.

This smart box will execute a programmable automation control to maintain the optimized humidity in the bird-house. This system is composed by wireless module, sensing module, power control module & APP U/I and other subsidiaries. It provides a great flexibility for customized applications.
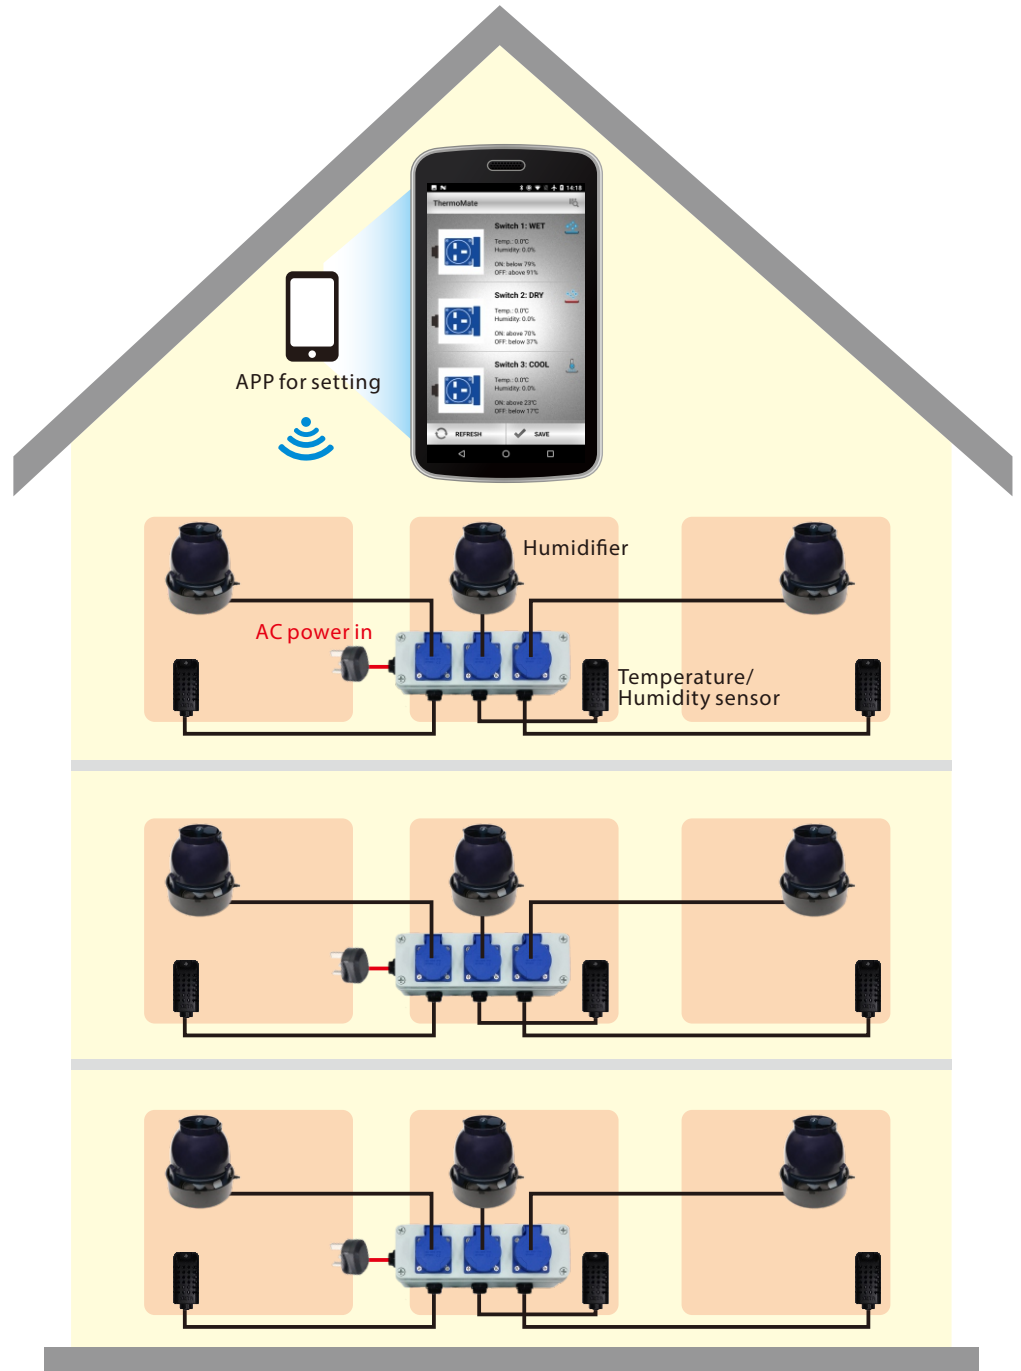

Product features:

. Precise temperature and humidity detection.
. One sensor controls one humidifier.
. Maintain optimized humidity in each room compartment.
. Give moisture and smoothness to the bird's nests.
. The easy-to-use APP may set up a predetermined humidity range for each humidifier.
